

Waterwatch Monitoring Sites 2007/08

This map displays sites which have been monitored to a Standard 3 or 4 level by Waterwatch monitors and coordinators during the 2007/08 financial year.

Standard 3 & 4 monitoring is defined by the Waterwatch Victoria Data Confidence Framework as monitoring which is conducted:

- for a scientific/data collection purpose,
- by monitoring groups who have undergone training and quality assurance checks,
- with equipment at a high level of resolution and accuracy, and
- on at least a quarterly basis.

To access the water quality data collected at these sites, please contact the regional Waterwatch program in your area of interest.

For more information about quality assurance/quality control surrounding Waterwatch water quality data, please see the website at www.vic.waterwatch.org.au.
